Education

University of Pittsburgh , <i>Bachelor of Science in Computer Science, Minor in Information Sciences</i> Anticipated graduation, Spring of 2026, GPA: 3.57 - School of Computing and Information - Relevant Coursework: Algorithm and Data Structures, Introduction to System Software, Introduction to Information Security, and Math Foundations in Machine Learning	08/2023 – Present Pittsburgh, PA
Montgomery College , <i>Association of Arts in Computer Science and Technologies</i> 3.67 GPA, Dean's List (Fall of 2021 - Summer of 2022) - Dual-enrolled at Montgomery College while in high school - Relevant Coursework: Computer Science I, Calculus I, and Introduction to Statistics	01/2021 – 05/2023 Rockville, MD
CompTIA Security+ (SY0-701) - Efficient understanding of risk management, threat detectors, and cyber operations. - ID: COMP001022871307	08/2025

Skills

Java 5+ years of experience, 15+ projects utilizing Eclipse, Notepad, and Visual Studio Code	AI Prompt Engineering 2+ years of experience, over 250+ data extractions with 100% accuracy	C 2+ years of experience, 10+ projects utilizing Terminal and Visual Studio Code
Python 3+ year of experience, 5+ projects utilizing Jupyter Labs	HTML 3+ years of experience, 10+ projects utilizing React and Visual Studio Code	C++ 2+ years of experience, 5+ projects utilizing Visual Studio Code

Professional Experience

Software Engineer Intern , <i>Bank of New York</i> - Migrated over 300+ data fields using AI prompt engineering with 100% accuracy. - Created synchronous transformations to upload user data. - Created asynchronous data transformations as a backup plan for broken user experience. - Utilized AI models to complete back-to-back transformations. - Implemented Insomnia to push requests.	06/2025 – 08/2025 Pittsburgh, PA
--	-------------------------------------

Hackathon Projects

Urban Vitals , <i>Massachusetts Institute of Technology, HackMIT 2025</i> - Developed a webpage designed to locate and rate neighborhoods on sustainability variables. - Implemented the Tandemn AI agent and API integration to collect data from open sources. - Utilized Tandemn AI model, Cerebras, Exas data queries, JSON, HTML, and CSS.	09/2025
Concert Connect , <i>Stanford, Tree Hacks 2024</i> - Developed a website designed for people to connect with others who have interests in the same music artist. - Learned and utilized React, TypeScript, and Convex.	02/2024
NeuroHeal , <i>Carnegie Mellon University, Tartan Hacks 2024</i> - Developed a mobile app to guide patients with concussions to a speedy recovery. - Completed 75% of project in under 24 hours. - Learned and utilized Flutter and Dart.	02/2024
Gear'd Up , <i>University of Pittsburgh, SheInnovates 2024</i> - Developed a web application to find the nearest POGOH bike stations within Pittsburgh. - Utilized JavaScript, React, Python, and Visual Studio Code. - Learned and utilized AWS Amplify and Figma.	01/2024

Organizations

SteelHacks , <i>Director of Sponsorship</i> - Raised over \$25,000 to ensure funds for hackathon event. - Network with external organizations to increase new partnerships. - Negotiate finances between corporate partners.	02/2025 – Present Pittsburgh, PA
Women in Computer Science , <i>President</i> - Lead 50+ members in weekly meetings; increasing engagement by 25%. - Streamline a variety of career-based topics to increase internship acceptance rates. - Increased mentorship program by 50%.	08/2023 – Present Pittsburgh, PA
Chinese American Student Association , <i>Vice President of Internal Affairs</i> - Lead a team of over 30 members. - Utilize Excel to manage operations. - Create and updated webpage for club.	08/2023 – Present Pittsburgh, PA
